YOUR CAR'S SEA SWIFT CRUISE

Because your car is important to you, it is important to us too.

Given the nature of sea freight, it could take 3-4 weeks for your car to reach its destination.

Why?

Essential Cargo such as food, fuel, and medical supplies travel ahead of general cargo items such as cars, boats, trailers, caravans, camper trailers, motorbikes and ATVs.

What should you do

- Contact Sea Swift at nt.admin@seaswift.com.au or 08 8935 2400 to discuss the time frame for when your vehicle is to travel
- **Do not put any essential items in your car that you MUST have** on arrival at your destination.
- Goods in and outside of your vehicle travel at your risk and maybe liable for additional costs if they exceed standard measurements (6m x 2.4m x 1.8m)
- Make sure the vehicle is serviceable so that we can move it
- Make sure that your vehicles insurance covers your vehicle when in transit
- Complete a waiver form
- Complete a vehicle Condition Report (which you will receive a copy)
- During the wet season, please take the necessary measures for prevention of mould

What will we do

- Take good care of your vehicle
- Store it in a safe and secure location until departure. (we cannot guarantee undercover parking)
- If it misses a service, make sure you know about it and advise you of the recovery plan
- Let you know when your car is available for collection

- In rare occasion your vehicle sustains damage. Inform a Sea Swift Team Member immediately and then contact your insurance provider.
